1. Executive Summary

Loop & Knot Aesthetics is a student-run handmade crochet brand offering aesthetic keychains, tech accessories, and desk companions. This documentation presents the complete website architecture, functional design, ordering workflow, and social media management strategy developed to launch the brand's digital presence at zero development cost.

The website was custom-built in-house using HTML, CSS, and JavaScript — no third-party platform fees, no subscriptions, and no external developers. It is designed as a single-page, multi-section e-commerce landing experience, styled around a soft pastel palette that reflects the handmade, artisanal nature of the products.

Sections	Products	Order Channel	Dev Cost
7 Core Sections	4 Categories	WhatsApp Direct	Rs. 0 (Self-built)

2. Website Concept & Tech Stack

2.1 Concept

The site follows a single-page, multi-section modern e-commerce landing page format — every product category, the customization tool, brand story, and contact options live on one continuous scrollable page, accessible through a sticky navigation bar. This format keeps load times fast, minimizes user drop-off, and mirrors the smooth, uninterrupted feel of scrolling through an Instagram feed.

2.2 Design Vibe

A pastel / soft aesthetic — cream, beige, blush pink, and sage green — was chosen specifically to visually echo the texture and warmth of hand-looped yarn. This is a deliberate departure from the harsh, high-contrast palettes typical of tech or corporate e-commerce sites, reinforcing the brand's handmade identity at every scroll.

2.3 Technology Stack

Element	Content	Purpose / Notes
Structure	HTML5 (semantic sections)	Defines page layout, content hierarchy, and accessibility
Styling	Custom CSS3 (Flexbox + Grid)	Pastel theme, responsive layout, animations — no framework bloat
Interactivity	Vanilla JavaScript	Powers the Customization Lab, dynamic product cards, WhatsApp links
Fonts	Fraunces (display) + Quicksand (body)	Editorial serif paired with a soft rounded sans for warmth
Hosting Option	GitHub Pages / Netlify (free tier)	Zero-cost deployment suitable for a student budget

Alternative no-code paths (Shopify, WordPress, Carrd) were considered but not used — building the site from scratch demonstrates technical capability to the evaluator while keeping recurring costs at zero.

3. Complete Website Structure & Sections

The website is organized into seven core sections, each engineered to move a visitor from discovery to a completed order with minimal friction.

A. Header / Navigation Bar

Element	Content	Purpose / Notes
Logo	“Loop & Knot Aesthetics” wordmark + stitch icon	Establishes brand identity on first glance
Nav Links	Home · Shop Collection · Custom Order · About Us · Contact Us	One-click access to every section via smooth scroll
CTA Button	“Order on WhatsApp” (sticky, always visible)	Keeps the conversion path open at all times

B. Hero Section (Above the Fold)

Element	Content	Purpose / Notes
Tagline	“Handcrafted with Love. Styled for You.”	Communicates brand promise in under 6 words
Visual	Floating product cards + soft animated blobs	Shows real products without relying on a slow carousel
Primary CTA	“Explore Collection” button	Scrolls directly to the Shop section
Trust Strip	250+ orders · 0% plastic · 5 student artisans	Builds credibility in the first 3 seconds

C. Featured Categories (Product Showcase)

Element	Content	Purpose / Notes
Category 1	Aesthetic Keychains & Charms	Mini anime figures, flowers, bag charms
Category 2	Tech Accessories	Crochet AirPods pouches & phone sleeves
Category 3	Desk Companions	Mini potted plants & motivational desk plushies
Category 4	Gift Bundles	Matching sets designed for friends & couples

Each product card displays a title, price, and a “Buy Now on WhatsApp” button that instantly opens a pre-filled order message — removing every extra step between interest and purchase.

D. Interactive Customization Lab

This is the website's core innovation feature — a guided 4-step configurator that lets a customer design their own piece before ordering.

- ✓ Step 1 — Choose Product Type: Keychain, AirPods Case, Phone Sleeve, Desk Plushie, or Gift Bundle
- ✓ Step 2 — Select Color Palette: primary & secondary yarn colors from the brand swatch library

- ✓ Step 3 — Add Custom Initials / Lettering: free-text field for names or monograms
- ✓ Step 4 — Review & Submit: a generated summary is sent as a pre-filled WhatsApp message

E. About Us / The Artisan Story

Introduces the five-member BBA student team behind the brand and foregrounds the sustainability angle: 100% eco-friendly, zero-plastic, entirely handmade by university students — a story that resonates with a Gen-Z customer base and differentiates the brand from mass-produced alternatives.

F. Customer Reviews & Social Proof

Testimonials from classmates and instructors sit alongside an Instagram grid preview, giving prospective buyers visual proof of real customers already wearing and gifting the products.

G. Footer

Element	Content	Purpose / Notes
Quick Links	Home, Shop, Custom Order, About	Secondary navigation for users who scroll to the bottom
Social Icons	Instagram, TikTok, WhatsApp	Direct routes into each platform
Payment Info	COD (campus pickup), EasyPaisa, JazzCash	Sets clear expectations before checkout
Copyright	© 2026 Loop & Knot Aesthetics	Standard legal footer line

4. Website Functionality — How Orders Work

As a student-run startup, the site intentionally avoids a complex payment gateway integration in its first version. Instead, it routes every purchase intent into a conversation — which builds trust and lets the team clarify sizing, color, or delivery details in real time.

4.1 Order Flow

- ✓ 1. Visitor browses the Shop or completes the Customization Lab
- ✓ 2. Clicking “Buy Now” or “Send Request” opens WhatsApp with a pre-filled message (e.g. “Hi, I want to order the Daisy Bag Charm in Pink”)
- ✓ 3. Team confirms availability, price, and delivery timeline over chat
- ✓ 4. Customer chooses a payment method and delivery option
- ✓ 5. Order is handmade and delivered / picked up

4.2 Payment Methods

Element	Content	Purpose / Notes
Cash on Delivery	Campus pickup only	Zero transaction risk for a student team
EasyPaisa	Mobile wallet transfer	Fast, widely used among students

Element	Content	Purpose / Notes
JazzCash	Mobile wallet transfer	Alternative wallet for wider reach

5. Social Platform Management Strategy

The website is the transaction hub; social media is the discovery and relationship engine. Each platform is assigned a distinct job so effort is never duplicated.

5.1 Instagram — Main Sales & Visual Hub

Element	Content	Purpose / Notes
Reels	7-second aesthetic process clips with trending audio	Drives reach through short, loop-friendly content
Grid	Clean product photography on neutral backgrounds	Builds a cohesive, premium-feeling storefront
Highlight — Prices	Live catalog with current pricing	Answers the #1 DM question instantly
Highlight — How to Order	Step-by-step visual guide	Reduces friction for first-time buyers
Highlight — Reviews	Screenshots of happy client messages	Social proof without leaving the app
Highlight — BTS	Behind-the-scenes crochet process	Humanizes the brand and builds loyalty

5.2 TikTok — Reach & Virality

- ✓ “Pack an order with me” — satisfying packing videos
- ✓ “What fits in this crochet pouch” — quick product-demo format
- ✓ Trend-jacking short clips to maximize algorithmic reach beyond the existing audience

5.3 WhatsApp Business — Customer Relationship & Catalog

- ✓ Full product catalog uploaded directly inside WhatsApp Business
- ✓ Auto-responder configured for common inquiries (price, delivery time, customization)
- ✓ Serves as the final checkout point for every order generated by the website

5.4 Weekly Content Cadence (Suggested)

Day	Instagram	TikTok
Mon	Product grid post — new arrival	—
Wed	Reel — process / BTS clip	Packing video
Fri	Story — customer review repost	Trend-jack clip
Sun	Reel — weekend restock announcement	“What fits inside” demo

6. Sustainability & Team

Loop & Knot Aesthetics is built and run entirely by a 5-member BBA student team, using leftover and eco-friendly yarn with zero plastic packaging. This positions the brand not only as a commercial venture but as a demonstration of sustainable, low-overhead entrepreneurship achievable within a university setting.

100% Eco-Friendly Materials	0% Plastic Packaging	5 Student Artisans
---------------------------------------	--------------------------------	------------------------------

7. Conclusion & Next Steps

This documentation captures the complete technical and strategic foundation of Loop & Knot Aesthetics: a zero-cost, self-built website paired with a structured, platform-specific social media plan. Together they form a launch-ready system that takes a visitor from first impression to a completed WhatsApp order in as few as three clicks.

Recommended Next Steps

- ✓ Deploy the site on a free host (GitHub Pages / Netlify) and connect a custom domain if budget allows
- ✓ Set up WhatsApp Business catalog and auto-responder before the first marketing push
- ✓ Launch with a coordinated first week of content across Instagram and TikTok per the cadence above
- ✓ Collect the first 10 customer reviews and update the website's testimonial section
